

ADMINISTERING MEDICINES TO STUDENTS

Medication may not be administered to students while at school unless such medicine is given to them by the school nurse acting under specific written request of the parent or guardian and under the written directive of the student's health care provider.

If a student has been approved for self-administration, a student who needs medication during the school day may be reminded to take the medicine by the school nurse or other individual designated by the school nurse in the student's medical administration plan. This provision only applies when the correct dosage of the medication has been placed in an individual container clearly marked with the student's name, the dosage to be administered, and the time and/or conditions under which the medicine is to be taken. No one but the school nurse, and those others listed in the medical administration plan acting within the above restriction, may give any medication to any student.

The school district shall, through the district nurse leader, register with the Dept. of Public Health and train personnel in the use of Epi-pens.

The school district may, in conjunction with the School Physician and the School Nurse Leader, stock nasal naloxone (Narcan) and trained medical personnel and first responders may administer nasal naloxone to individuals experiencing a life-threatening opiate overdose in a school setting.

Following consultation with the school nurse, students who fall into the following exceptions may self-administer medications:

1. Students with asthma or other respiratory diseases may possess and administer prescription inhalers.
2. Students with cystic fibrosis may possess and administer prescription enzyme supplements.
3. Students with diabetes may possess and administer glucose monitoring tests and insulin delivery systems.
4. Students with life threatening allergies may possess and administer epinephrine.
